GitHub

Software Engineer with experience in designing and developing back-end solutions for the Banking and Financial Services sector. Skilled in Java, Microservices, and cloud technologies, with a proven skill to deliver scalable, high-quality enterprise applications. Targeting challenging opportunities in Hyderabad or remote settings to contribute to innovation and business success.

PROFILE SUMMARY

- Java Backend Developer with over 5 years of experience in designing, developing, optimizing, and supporting enterprise-grade applications across the Banking and Financial Services domain.
- Strong expertise in Java, Spring Boot, REST APIs, back-end development, distributed systems, database integration, API optimization, automation, and high-volume transaction processing, delivering scalable enterprise solutions.
- Prove track record of improving application performance, system throughput, production stability, operational efficiency, monitoring, and reliability through back-end engineering, automation, troubleshooting, and optimization initiatives.
- Skilled in collaborating with QA, business stakeholders, and cross-functional Agile teams to deliver reliable enterprise applications, support production environments, and minimize software defects.
- AWS Certified Developer – Associate with practical cloud knowledge and hands-on exposure to React.js, OpenAI-compatible APIs, prompt engineering, LLM integrations, and AI-powered application development through continuous learning and practical projects.

TECHNICAL SKILLS

- Languages:** Java, SQL
- Frameworks & Technologies:** Spring Boot, Spring Framework, Spring Data JPA, Microservices, RESTful APIs, React.js, HTML5, CSS3, JUnit, Mockito
- DevOps, Monitoring & AI Technologies:** Splunk Dashboards, Log Monitoring, Docker, Jenkins (CI/CD Pipelines), Postman, JIRA and Generative AI Tools (ChatGPT, Claude), GitHub Copilot | **Developer Tools:** Maven, Git, Docker, CI/CD

CORE COMPETENCIES

- Java Backend Development, Spring Boot Application Development, Microservices Architecture, RESTful API Development
- Distributed Systems, Payment Processing Solutions, Application Performance Optimization
- Production Monitoring & Observability, Backend Automation & Workflow Engineering, Agile Software Development

WORK EXPERIENCE

Tata Consultancy Services | System Engineer | Client: JP Morgan Chase

March 2023 – Present

Domain: Banking & Financial Services | Technologies: Java, Spring Boot, Microservices, REST APIs, Jenkins, Docker, Splunk, React.js

- Backend & API Engineering:** Engineering Java-based back-end services and RESTful APIs for an internal service virtualization platform, supporting end-to-end testing of banking applications across QA, UAT and Production environments.
- Service Virtualization & Testing:** Developing a Virtualization DSL (Domain-Specific Language) to simulate back-end services and execute workflow for account opening/closure, loan initiation, credit card verification, registration, and other banking processes without direct database dependencies.
- Observability & Automation:** Building Splunk dashboards, log monitoring, error analysis, and automated alerts to identify recurring issues, root causes, and affected source files; developing UI-based automation to simplify virtualization configuration and test execution.

Achievements

- Backend & Performance Engineering:** Designed and enhanced scalable Java back-end services and REST APIs for enterprise banking applications, improving API response time by 40% and increasing throughput for high-volume transactions; scaled the platform from 1,000 to 10,000 concurrent users through performance optimization and load balancing.
- Service Virtualization & Automation:** Developed a reusable DSL-based service virtualization framework across JavaScript, Java, and Playwright, reducing end-to-end testing effort by 40–50% and manual configuration from 3–4 days to 5–10 minutes; enabled adoption across 50+ internal teams.
- Observability & Production Stability:** Built Splunk dashboards, log monitoring, automated alerts, and root-cause analysis capabilities, reducing production downtime by approximately 60–80% and enabling recurring error detection within a 30-minute monitoring window.
- Platform Modernization & Efficiency:** Developed an internal UI-based automation platform that reduced manual effort by 80%, converted the virtualization implementation from JavaScript to Java within 30–45 days as part of a 3-member team, and automated Maven dependency upgrades using Rewrite recipes, reducing upgrade effort by 90%.

Virtusa Consulting Services

Associate Engineer – Java Developer | Client: Citi Bank

May 2021 – March 2023

Domain: Banking & Financial Services | Technologies: Java, Spring Boot, REST APIs, SQL

- Payment Processing:** Developed and optimized Java-based payment processing modules and REST APIs, improving transaction-processing efficiency by 30% across high-volume banking applications managing lakhs of daily transactions.
- Payment Workflow Optimization:** Redesigned back-end payment workflow and API processing, reducing transaction failures by 20% and improving response times from seconds to milliseconds for enhanced transaction responsiveness.
- Multilingual Banking Solutions:** Developed AI-powered multilingual data processing supporting approximately 12 languages, integrating language-conversion/LLM tools to encode, decode, store, and serve regional-language data through banking APIs.
- Database & API Optimization:** Optimized SQL/MySQL queries and database operations for transaction validation, reporting, and multilingual data retrieval, improving data verification and application performance.
- Quality & Agile Delivery:** Developed JUnit test cases and collaborated with QA, business stakeholders, and cross-functional Agile teams to deliver reliable payment and loan-processing services with API integrations, database operations, and customer notifications.

CERTIFICATIONS

AWS Certified Developer – Associate 2025 | GitHub Foundations Certification 2024

EDUCATION

Bachelor of Mechanical Engineering | K.S.R.M College of Engineering | 2017 – 2020

PERSONAL DETAILS

Languages Known: English, Telugu | Address: Hyderabad-500075 | Date of Birth: 4th March 1997
